

IRT CRONISTA™

Thermographic Organizer Analyzer Reporter

Finally, an infrared inspection software package with advanced features that simplify analysis and report generation that supports virtually all makes and models of infrared cameras available today.

IRT Cronista® is a powerful yet easy to use software package that lets you easily analyze and document your infrared inspections. With its intuitive user interface, Cronista reduces training costs, and will quickly become the cornerstone of your infrared inspection program. Whether your program employs one or many different infrared cameras, IRT Cronista® provides the means to organize, analyze and communicate the results of your inspections.

IRT Cronista® offers a wide range of powerful analysis tools including multiple measurement points, multiple profile lines, area analysis, automatic Hot Spot detection and many more. With IRT Cronista® you can perform comparative evaluations and trend analysis of multiple images simultaneously.

IRT Cronista® is Windows®-based, and interfaces directly to Microsoft Word, allowing you to create detailed multi-page reports with the push of a button, and your reports can easily be shared with co-workers and customers. Report templates are easily customized, allowing you to configure your reports with your own company information, and for specific applications.

IRT Cronista® supports a large number of infrared camera image formats, and is independent of camera manufacturers. It is compatible with most modern infrared cameras available today, as well as with many older models. Contact us for details.

IRT Cronista® is a unique and highly sophisticated tool for organizing and evaluating your infrared images and for producing detailed inspection reports. Contact us today for a free demonstration copy to see how IRT Cronista can simplify your infrared inspections.

Main Features:

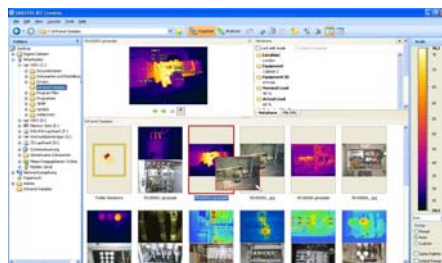

- Quick and easy one-step report generation in standard Microsoft Word® format
- Easily share reports with co-workers and customers
- Detailed analysis with powerful temperature measurement tools: multi points, multi profile lines, area analysis, hot spot detection, isotherms and more
- Analyze multiple infrared images simultaneously with adjustable zoom in analysis mode
- Easily link infrared images, visual images, voice and text notes - automatic or manually
- Easily organize your infrared images: quick overview of infrared image, corresponding visual image and text notes
- Compatible with a wide variety of infrared camera image formats
- Customized report layout templates
- Multiple languages supported

IRT CRONISTA™

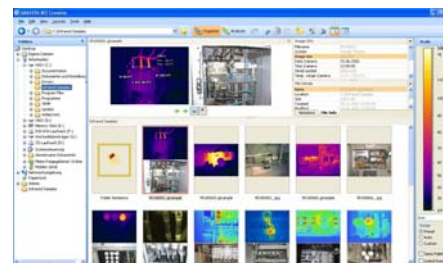

Thermographic Organizer Analyzer Reporter

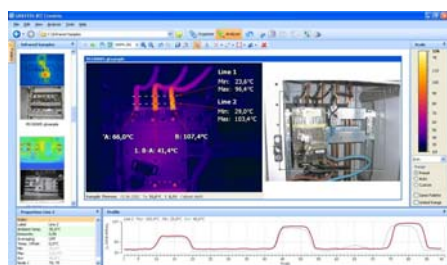

Management of infrared image, visual image and corresponding image annotations - easy organize and manage your files in folder structure similar to Microsoft Explorer®

Easily link visual and infrared images - automatic or manually, simply by drag and drop

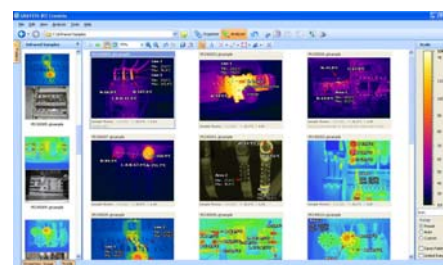

Preview of infrared and visual image and corresponding image annotations - preview images and annotations and add or change the annotations

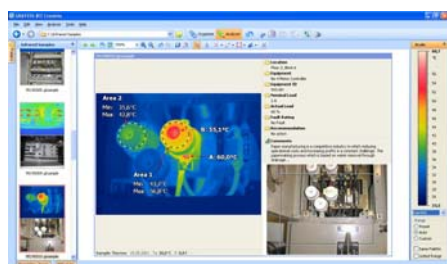

Easy image analysis with multiple points, profile, & areas - preview infrared and corresponding visual image, define temperature range settings and analyze infrared images

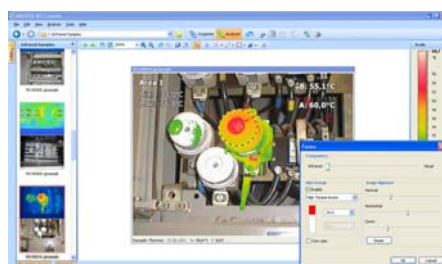

User-defined digital zoom - zoom-in to see the smallest details in the image

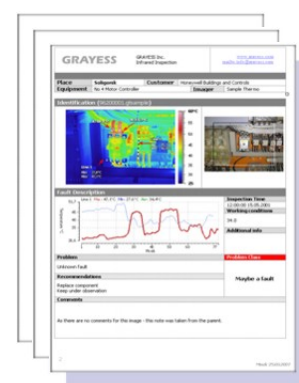

Simultaneous analysis on several images - adjust zoom and work on several infrared images at the same time

Analyze while viewing the IR image, visual image and annotations - analyze the infrared image, change the corresponding annotations, and link/change the corresponding visual image

Analyzing in Fusion view - blend IR image and corresponding visual image together using Image Fusion technology, making interpretation of your work even easier

Create fast and comprehensive high quality multi page reports o with just one mouse click! Customized your templates to match your specific needs
